- Run by organisations with an income of less than £1 million*; £200,000 for Small Grants.

The restriction does not apply to the Samaritan Grant programme.)*

GRANT PROGRAMMES

SPECIAL INTEREST GRANTS

This is our main grant programme through which we want to support thoughtful projects responding to unmet health needs and the limiting effects of poverty.

Applications are judged on how they might make a difference. We want to target our grant making in areas of greatest need, those London boroughs or wards with the highest indices of deprivation.

Successful applicants will have evidence to support their proposal and be clear about what they want to achieve.

Our Trustees are always interested in receiving thoughtful proposals from organisations tackling unmet health needs.

SAMARITAN GRANTS

These are grants available to social work teams, hospital teams, voluntary and community organisations and faith groups working directly with and able to distribute one-off grants to people in need.

SMALL GRANTS PROGRAMME

We make a limited number of smaller grants to help set up, or develop, health and social welfare projects in areas of high need. We are interested in specialist **volunteering and advocacy projects** that support people, and their carers, to access health and community services and other **activities to promote good practice and share specialised knowledge in health and social care.**
